BLUEBERRIES **PRICE \$11.00 each**

Rabbiteye varieties. 1-gallon pots.)

PREMIER: Mid-season, large firm berries, very good flavor, and the berries store well. Bright green foliage makes it good for ornamental use.

TIFBLUE: Mid-to late-season, large, firm berries, light blue in color and quite flavorful. Popular for its appearance and productivity.

CLIMAX: Small-medium size berries. Good color and flavor. Ripens late May-early June.

DNSLOW: Mid-to late-season. Vigorous, Semi-upright fruit. Self-pollinating.

COLUMBUS: Early to mid-season. Excellent fruit size and good flavor. Pollinator: Tifblue

BLACKBERRIES **PRICE 9.00 each**

All are thornless and upright; 1-gallon pots.)

/ON: Large uniform fruit, great sweet flavor with small seeds. Excellent quality. Mid-late season. First thornless blackberry, just released from NC State.

UCHITA: Sweet, cone-shaped large berry. Ripens late (mid-June). High yielding. Excellent flavor.

APACHE: Large size fruit, excellent quality, ripens late (mid-June). Cold hearty and high yielding.

RASPBERRIES **PRICE \$9.00 each**

(Varieties are thorny. 1-gallon pots.)

HERITAGE: Most popular variety. Dark red berries. Large crops of large sweet berries. Ripens July-Sept.

CAROLINE RED: New! Excellent flavor. Produces heavy crops of large raspberries. Ripens June and September. Very vigorous and tolerant of root rot. Self-pollinating.

BUNCH GRAPES **PRICE \$10.00 each**

(1-gallon pots.) Seedless varieties.

JUPITER: Reddish-blue color, very large and semi-crisp fruit. Ripens in August. Great for fresh eating.

NEPTUNE: Large yellow-green fruit. Juicy and highly flavorful. Ripens in September. Resists cracking. Disease resistant and cold hardy.

MUSCADINES **PRICE \$10.00 each**

(Potted in 1-gallon pots.)

ISON: Black self fertile. Large clusters. Ripens early. Edible skin and firm pulp. Very sweet (19% sugar), produces excellent juice.

SCUPPERNONG: Bronze, female variety. Will need a pollinator. Medium size fruit. Ripens mid season. Vigorous and cold hardy. (17% sugar)

STRAWBERRIES **PRICE \$13.00/25**

EARLIGLOW: Early, medium berry, excellent for fresh eating and freezing due to its sweet berries and uniform color

CAVENDISH: Early midseason, large berry, good disease resistance, high yielding, excellent flavor

APPLE TREES **\$18.00 each**

WINESAP: Bright to deep red speckled skin. Yellow, firm, crisp flesh, tangy flavor. Good for dessert, canning or juice. Early bearer. Pollinate with Fuji, Red Delicious, Yellow Delicious or Gala.

YELLOW DELICIOUS: Mid to late season apple, yellow-green to light yellow fruit color, extra juicy, crisp, and sweet! Used either fresh or for cooking. Self-pollinating.

GRANNY SMITH: Green fruit utilized for fresh eating or cooking. It blooms very early to early season. Will need a pollinator.

GALA: Yellow-orange to red fruit used for fresh eating and blooms early to mid-season. Will need a pollinator.

If you would like to purchase other fruit trees, please contact us directly at 287-6190. We can get multiple varieties of APPLE, CRABAPPLE, FIG, PEAR, PERSIMMON, ETC. Prices will vary.

All trees will be bare root.

RUTHERFORD COUNTY 4-H

4-H is an educational program for both boys and girls, ages 5-18. Exciting club and special interest programs along with other activities and events support the "learning by doing" concept of 4-H.

The four H's stand for HEAD, HEART, HANDS, and HEALTH. Subject matter and life skills are learned by the 4-H'ers through 4-H projects and activities, ranging from animal projects to canning projects to photography and electricity. For more information on 4-H in Rutherford County, contact the Cooperative Extension Center at 287-6190.
